PROFESSIONAL OVERVIEW

Full-stack web developer with experience in WordPress and CMS development, Shopify storefronts, custom web applications, and website maintenance. Builds and updates WordPress websites with Elementor, custom page layouts, content management, and form integrations. Also works across BigCommerce, Wix, and Squarespace, combining theme customization, API integrations, and AI-connected applications with clear written communication.

PROFESSIONAL EXPERIENCE

Full-Stack Programmer — POST Inc.

2025 — Present

• Build and maintain WordPress, CMS-based websites, and Shopify storefronts for international clients, primarily in fashion, through theme customization, page development, and ongoing updates.

• Develop WordPress pages with Elementor and form integrations; update homepages, product pages, blogs, and CMS content across Shopify, Wix, Squarespace, and other platforms. Support live sites through fixes, API integrations, plugins, and routine checks.

• Develop custom Shopify apps, AI-connected applications, and internal tools, including a styling recommendation app, HTML Link Generator, and flipbook ordering workflow.

Front-end & Back-end Developer · Internship — The Eastforge Inc.

2025

• Worked on Thread & Cupid, a BigCommerce ecommerce website, using the Stencil framework and backend tools.

• Customized themes, improved UI/UX, integrated third-party APIs, and supported product and order functionality.

Project Manager & Full-Stack Developer — University of St. La Salle–Bacolod

2022 — 2024

• Developed frontend and backend features for CRUD-based web and mobile systems for Spot.Pub Café and Coasing Clothing.

• Coordinated development milestones and team delivery for the Komyuter capstone and Flutter-based VetSync application.

News Writer & Ascribe Head — Tigris Publication

2023 — 2025

• Contributed news writing and editorial leadership, bringing experience in research, clear communication, and team coordination.
